

JESSOP ARCHITECTS ARE AN AWARD WINNING ARCHITECTURAL PRACTICE.

We are one of New Zealand's leading multi-disciplinary architectural firms, working across a myriad of architectural styles. Jessop Architects pushes the boundaries of new materials and technology to create innovative homes that are energy efficient, eco-friendly, and beautiful. Based in Auckland, our work can be found throughout New Zealand, as holiday homes in popular coastal regions or as commercial developments and residential homes in the greater Auckland region.

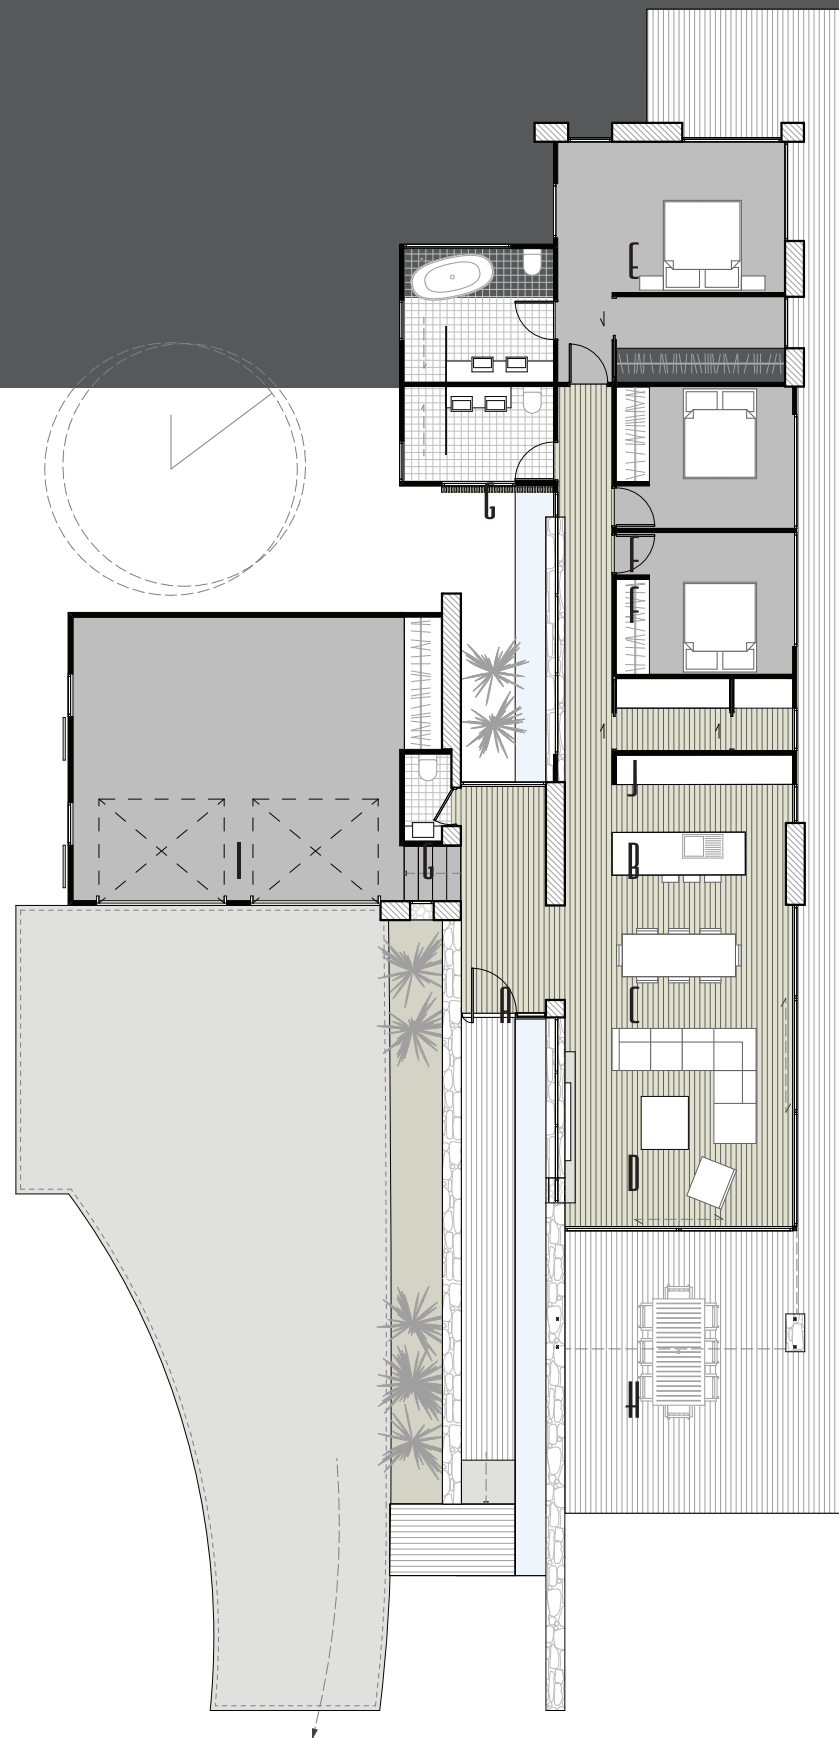

WEITI BAY ONE

Weiti Bay One is a sleek convergence of modern design and traditional materials. Keeping within the Weiti Bay Architecture code, the home asserts its lineal form and enduring stature. Long lengths of stone accentuate and frame different thresholds whilst embedding the architecture into the landscape.

WEITI BAY ONE

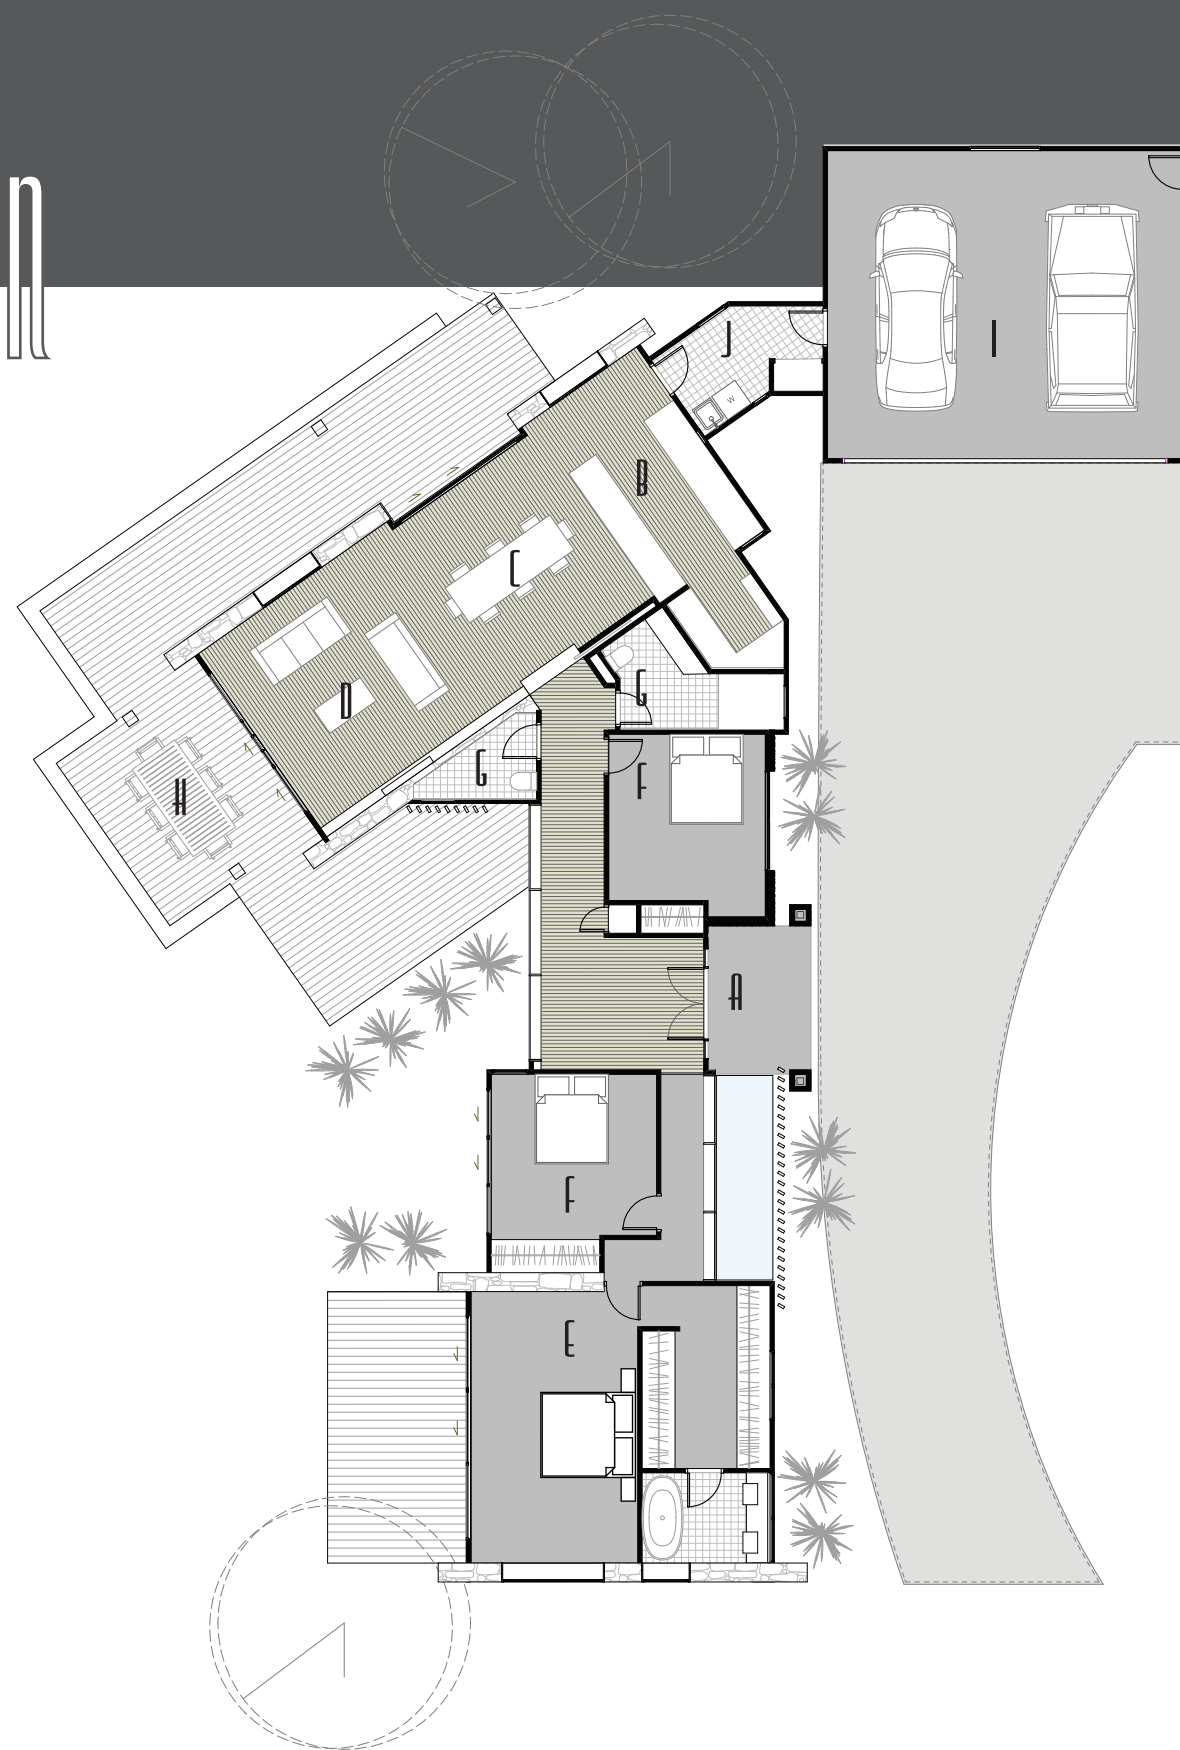

WEITI BAY TWO

Weiti Bay Two takes elements from its predecessor (wbOne) and other work jessop regularly produces. The home has a combination of intimate and expansive spaces perfect for year round living. The architectural design adopts a combination of warm timbers and stone to produce tactile and temperate spaces throughout. Weiti Bay Two is an example of enduring architecture that will provide beautiful living spaces for generations.
